Introduction 1

I Foundations

1 Architecture and Innovation 19

Architecture 19

The Relationship between Architecture and the Economic System 23

The Relationship between Architecture and Innovation 28

II The End-to-End Arguments and the Original Architecture of the Internet

2 Internet Design Principles 37

Modularity 38

Integrated Design 44

Layering 46

Modularity and Layering in Network Architectures 50

The End-to-End Arguments 57

3 The Original Architecture of the Internet 83

Introduction to the Original Architecture of the Internet 83

The Internet and the Layering Principle 88

The Internet and the End-to-End Arguments 90

Some Misconceptions about the End-to-End Arguments and the Architecture of the Internet 103

III Architectural Constraints on Innovation

4 Architecture and the Cost of Innovation 115

Costs of Change in Modular and Integrated Architectures 118

Costs of Change in the Original Architecture of the Internet 137

5	Architecture and the Organization of Innovation	165
	Architecture and Organization in Modular and Integrated Architectures	166
	Implications of the Link between Architecture and Feasible Governance Structures	195
	Architecture and Organization in the Original Architecture of the Internet	201
6	Architecture and Competition among Makers of Complementary Components	215
	Architectural Differences—Application Awareness and Application Control	217
	Effect of Ability to Discriminate or Exclude	218
	Effect on Pricing Strategies	273
	Conclusion	280
IV The End-to-End Arguments and Application Innovation		
7	Network Architectures and the Economic Environment for Application Innovation	285
	Potential Deviations from the End-to-End Arguments	286
	The Four Network Architectures	287
	Analysis	289
8	Decentralized versus Centralized Environments for Application Innovation	297
	Effects of Differences in Innovator Diversity and in Control over Innovation	298
	Effect of Differences in Control over Deployment	349
	Overall Effect of Architectural Differences on Application Innovation	351
9	Public and Private Interests in Network Architectures	355
	Public Interests in Network Architectures	355
	Network Providers' Private Interests in Network Architectures	371
	Conclusion	377
	Notes	393
	References	495
	Index	551
